Description

This tea table includes a circular two-board top with a plain rounded edge over a birdcage mechanism that allows the table to swivel. Two cleats with shaped ends are attached to the underside of the top. Wooden pins inserted through the cleats into the birdcage allow the top to tilt vertically for storage. A small brass spring latch secures the top when in use. The table top and birdcage assembly fit over a dowel post secured by a wooden wedge. The post has been turned with a column above a flattened ball. Three cabriole legs end in pad or "snake" feet.
