

Basic Detail Report

Weathervane

Primary Maker

J. W. Fiske Iron Works

Medium

Cast iron, molded copper, and tin

Description

A three-dimensional weathervane in the form of a trotting horse pulling a sulkey with a driver who wears a flat-crowned cap and sports a large moustache. The horse's tail streams back along the right side of the driver. The

vane sits atop a wind direction indicator above a circular seamed ball. A mounting bracket of four heavy gauge flat iron steps angle outwards from beneath the ball to attach the weathervane to its post.

Dimensions

51.75 × 39 × 20 in. (131.4 × 99.1 × 50.8 cm)
